

# BOOKS ARE CALLING YOU

**Keywords : 1- Character week 2-Audio book 3-Tales from students 4-Signature days**

After Z-Library opened ,first we started to work with carrying our books from old library.Firstly in the light of informations which we had learned in the seminar of The Ministry of National Education in Bodrum,we cataloged our books according to J.Dewey cataloging system and we formed our shelf system.Then we barcoded our cataloged books and passed to the automation system.

Tale Studio has founded by librarianship club students.And three books had published according to particular plot. Our students signed books with all the other famous writers at Adana Book Fair signature day.This activities had an influence on improving student's reading and writing skills.

To increase reading culture and attention to the library , we printed character-themed bookmarks every year to distribute them at Book Fair.These bookmarks affected positively,student's interests to reading.We designed School calendar and we added photos in it about reading culture and Z-Library. Again , this calender distributed to all students at Adana Book Fair. In theWeek of Libraries, our students characterized their favourite book characters and made activities for all week.Club students had founded a radio station and they sounded books there at lunch times. They broadcasted audio books on the radio station. If these activities make at other schools the reading culture will increase.And these activities will contribute positive affects to student's understanding skills.

We invited graduates with good careers from Ceas Anatolian High School to the Z-Library.And we conducted seminars called : ' I have read books, my life changed'. Famous writers made conversations with our students in the Z- Library.Our students redesigned book covers to increase reading culture. In this manner,attention has increased to our library .To create an interest to the library. We should make these activities at other schools.In that manner attachment to boks will increase .

Z-Library inspired other units in school. In this way Z-Lab corridor has made,inspired by Z-Library's architectural.
